

Children deserve the right to turn on the T.V. and not be exposed to explicit content. What children see on TV greatly impacts their decisions and their sense of self worth. To allow explicit content on regular broadcast T.V. will have moral consequences for current and future generations. Adding more nudity, profanity, violence, and drugs will only add to the growing problems of pregnancies to unwed teen mothers, drug addiction, and violence. Children mimic what they see. Please help future generations by keeping nudity and profanity off T.V. and radio.
